

## An Integrated Approach to Chemical Recycling – Carsten Larsen, CCO of Agilyx

A pioneer in chemical recycling, Agilyx was a first mover in the pyrolysis space over a decade ago. Its early experience led to the understanding that a lack of accessible and suitable feedstock would continue to be a barrier to circularity unless something was done. Agilyx Chief Commercial Officer, Carsten Larsen, will highlight the end-to-end solution that incorporates the company's feedstock management solution and joint venture with ExxonMobil, Cyclyx, discussing how "waste to feedstock" is a critical factor in making circular pathways feasible.
