Abstract ARC – EU Policy Update on Chemical Recycling and Mass Balance & Attribution

In 2024, the European Union advanced its regulatory framework that will impact the market for chemical recycling. Among these advancements are the adoption of the Packaging and Packaging Waste Regulation and the entry into force of the Ecodesign for Sustainable Products Regulation. During this presentation we will delve deeper into the newly adopted quotas and what they mean for chemical recycling. Additionally, we will explore what is coming under the new Commission.
